

A dark blue geometric shape, resembling a stylized lightning bolt or a jagged triangle, is positioned in the upper left corner of the slide. It has a sharp point pointing towards the center of the page.

A Space For Tyler

Allison Voigt

Tyler

- 16-year-old who has Autism
- Has recently experienced seizures
- Loves the outdoors, Mario, Disney movies, and colors
- Does not like his therapy.

Sandy

- Tyler's mom
- Has concerns with Tyler's safety
- Has helped out with Tyler's therapy a lot at the Autism Center
- Wants Tyler to become more independent

Who's using the space?

Goals for the space

The Office

- Create a stimulating space for learning
- Design a versatile therapy room

Technology Room

- Create a versatile space.
- Create a comfortable space.

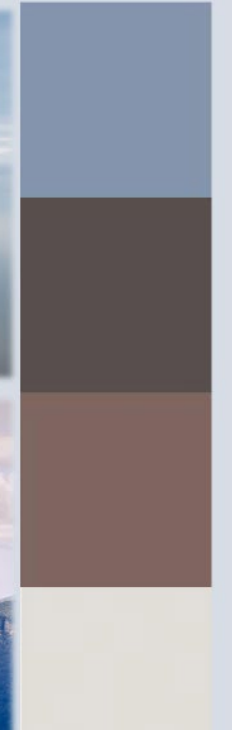

Bedroom

- Design a space that encourages therapy.
- Create a space that is calming and comforting

Organization Sensation

The Concept Statement

Therapy is an important part of Tyler's life, but it's not something he enjoys doing. Putting together an organizational piece that uses color, something Tyler likes, will hopefully make integrating his therapy into his everyday life easier or even enjoys. The goal is for Tyler to choose his own outfits on a daily basis but still look nice and put together. Using color-coordination, Tyler will get to look at beautiful, bright hues of color (in the order they would be in in the rainbow, of course) while choosing what he's going to wear.

Ideation Sketches

Originally, I was going to have the element outside the closet, but that got to be too much joinery for the small room.

Final Solution

Some ideas of what could be stored inside.
